

If you were going to type a report would you use your PC or an old manual typewriter?

Question?

“Why would you use old antiquated equipment to carry out functions in meetings when much newer and more familiar technology would do the job so much quicker and save your company money immediately?”

Research says that businesses can do everything around 75% quicker using Clevertouch Pro interactive touchscreen technology in meetings as oppose to whiteboards, projectors and flip charts – all of which, unbelievably, were invented in the 1950’s, 1980’s and 1970’s respectively.

Facts

Clevertouch Pro interactive touchscreens produce a stunning image - 955% more pixels than a data projector.

Focus in on a particular detail simply by making it

Zoom in

bigger by using fingers or stylus.

Annotate,
Anywhere,
Anytime

Annotate over any documents, images, videos and using a device called Montage share in real time with other meeting attendees, locally or anywhere in the world.

Integrate

If using SKYPE for business (or similar systems) and video conferencing, this technology is easily integrated, working perfectly with this touchscreen technology.

Save & Email

Notes and changes to images, drawings, videos and documents can be saved and emailed immediately to all meeting attendees, remote or otherwise. No more typing up of whiteboard notes!

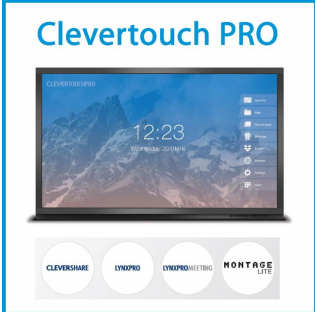

Easy to use
and secure

Using the Clevershare device supplied with each screen means there are no cables to connect making it simple for anyone to use and the Clevertouch Auto Wipe means that any sensitive material and emails are deleted each time the screen is shutdown.

Wifi
Hotspot

Users of the technology can create their own 'Wifi Hotspot' which means that the touchscreen does not need to be connected to the company's network.

Proactive AV are an accredited partner of the market brand leader:

If you want to be able to collaborate with other members of staff in remote locations, just add the Montage Box to your Clevartouch Pro and this will allow everyone to share and annotate over meeting notes, drawings, documents and media in real time anywhere in the world.
