

PRO-V3

Enterprise level Digital Signage player - Powerful, Compact and Flexible

The Sedao PRO-V3 lets you create dynamic, engaging alternatives to traditional posters. Use screens of any size, landscape or portrait, to simultaneously display multiple information zones using all your existing media - movies, photos, websites, electronic posters and more.

Sedao Digital Signage is the best way to communicate and engage with your audience. Sedao's unique technology takes care of the technical detail for you, by re-sizing images and movies as well as playing hundreds of formats. Simply upload your media.

Our expertise is at your fingertips. Sedao offers you:

- Over a decade of industry-leading signage software development
- Experience providing solutions to every business sector
- Proven reliability, having supplied tens of thousands of professional Digital signage players with hundreds of millions of hours of trouble-free digital signage
- Enterprise level features, flexible training packages (if needed) and ongoing support options
- Sedao's **unique ease of use**
- The ability to create your own layouts or 'cloud channels' at SedaoLive.Com with the PRO-V3-IF version (which includes our industry-leading ImageFlyer software pre-installed)

The PRO-V3 is the very latest evolution in Sedao's enterprise level digital signage players. Elegantly simple to update and commission, just one logo and two photographs is all that is needed to get started in the exciting world of Sedao digital signage.

The PRO-V3 is the first system to support use as a Cloud, LAN or stand-alone signage player.

Sedao... digital signage for busy people

Sedao understands your business. We've been providing digital signage solutions to every business sector since 2004. No two schools, companies, hospitals, retailers, hotels or businesses operate in the same way, and recognising this has been a key to Sedao's success.

Our most versatile player yet

Sedao signage does what you need it to, and the PRO-V3 is our latest evolution of signage player, capable of supporting all of Sedao's features and able to operate either with our Cloud service at www.sedaolive.com, with your own LAN, or as a stand-alone signage player.

Future Proofed

Your PRO-V3 is future proofed for whatever you may want to do later. Advanced MMZones, IPTV, Touch Screen capability (for use with Kiosks), Time-of-Day Scheduler, Resolution Independence and more are built-in as standard.

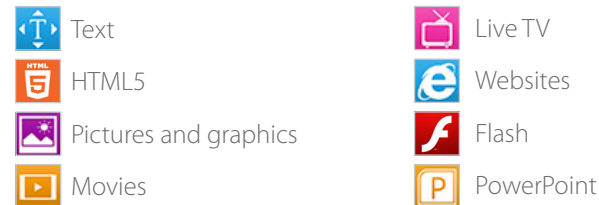

Powerful and easy to use

The Sedao PRO-V3 comes with hundreds of features including:

- Sedao's user friendly '60-second signage system' to get started. Just add a logo and two photos to create a gallery of signage channels – all personalised to you
- Design your own signage channels with *Dynamic Design* our intuitive live 'drag and draw' solution

Media

Plays multiple media zones in just about any format, including:

Cloud - using SedaoLive

Controlling your Sedao signage network over the Cloud makes managing large networks something anyone can do, anywhere from any device that's connected to the internet.

Sedao's unique visual UI shows you all your screens, what's playing and more. Select screens with a click, change channels or send emergency messages to your entire signage network in seconds.

LAN or Stand-alone

The PRO-V3 comes bundled with a suite of software to let you control all your signage over your local area network (LAN), including the built-in CMS system, remote desktop server and support for Sedao's LAN content publishing app.

As a full Windows® PRO solution, the PRO-V3 can also operate as a stand-alone player, ideal for areas where there's no network.
