Business Name PROACTIVE LEARNING LIMITED
trading as PROACTIVE AV

Registration Number [CBDU182555](#)

Company Number [05145648](#)

Expiry Date 24/06/2029

Proactive will aim to recycle as much WEEE as possible. Any interactive screens that cannot be recycled by us will be passed on to our waste management provider, Flame UK, for recycling and safe disposal.

Flame UK ensure that obsolete screens falling under the WEEE and POPs (Persistent Organic Pollutants) directives are recycled wherever possible. Recoverable materials are extracted and either melted down or repurposed, while plastics containing Persistent Organic Pollutants (POPs) are incinerated in compliance with environmental regulations. This process reduces the environmental footprint by utilising energy recovery methods, contributing to renewable energy generation. **Current figures from Flame UK are that 80% of WEEE is recycled** and 20% is incinerated.

Flame UK delivers compliant, hassle-free WEEE (Waste Electrical and Electronic Equipment) management services to businesses across the UK. From collection to recycling and safe disposal, Flame UK ensures we meet all legal requirements while supporting our sustainability goals.
